

Landscaper Pro®

New long-lasting controlled release mineral fertilizers for the professional landscaper

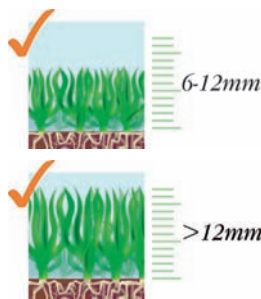

www.landscaperpro.co.uk
www.landscaperproie.com

- * High in available nutrients
- * Very reliable nutrient release over a longer period
- * Long-lasting and safe to plants
- * Fantastic value as nitrogen is delivered over a longer period
- * Keeps plant in balance with top growth matched by thick root mass

Why other fertilizers don't match up to Landscaper Pro

There are a number of different types of fertilizer on the market, and sometimes the choice can be confusing. Here's our rundown of how other common fertilizers fail to match up to the Landscaper Pro range's unique attributes.

Pure natural organic fertilizers

- ! Low in available nutrients, especially nitrogen
- ! Unreliable nutrient release rate
- ! Expensive, considering low nutrient content

Mineral organic fertilizers

- ! Unreliable nutrient release due to organic element
- ! Potential damage from minerals if wrongly applied
- ! Fast release of minerals promotes top growth but not root length

Agricultural mineral fertilizers

- ! Fast release that promotes top growth over root development
- ! Short, effect, with no lasting nutrient delivery
- ! Harsh on plants, potentially damaging if wrongly applied

Maintenance

24+5+12
(24+2+10)

This is the hero – the essential general maintenance controlled release fertilizer which can be used as a base for almost all landscape programmes

- Balanced nutrients are released over a sustained time period
- Rapid visual response and longer term plant health
- Fewer applications needed per year

Application rate: 35g per sq. m

Area treated by a 15kg bag: 420sq. m

Suggested use period

Longevity: 2-3 months

Stress Control

16+5+22
(16+2.2+18.3)

Extreme temperatures can cause grass to become stressed but applying Landscaper Pro Stress Control will help

- Enables the plant to boost its own cell strength
- Increases nutrient content within the plant
- Enables the plant to withstand the adverse conditions

Application rate: 35g per sq. m

Area treated by a 15kg bag: 420sq. m

Suggested use period

Longevity: 2-3 months

New Grass

20+20+8
(20+8.7+6.6)

A versatile product used when putting down turf, seeding new grass or renovating an existing lawn

- Nutrients are supplied in a balanced way as not to damage vulnerable roots
- Helps young seedlings and new turf to quickly develop into energetic and balanced young plants
- Strong enough with just a few months to outgrow invasive weeds

Area treated by a 15kg bag: 420sq. m

Suggested use period

Longevity: 3 months

All Round

24+5+8 + 2%MgO
(24+2.2+6.1 + 1.2%Mg)

The perfect 'in between' product with a unique coating for long term nutrition

- Can be combined with other products like Moss or Weed Control for comprehensive landscaping programmes
- Helps young seedlings and new turf to quickly develop into energetic and balanced young plants
- When used with Pre-Winter it will fortify plants for the colder months

Application rate: 45g per sq. m

Area treated by a 15kg bag: 330sq. m

Suggested use period

Longevity: 4-5 months

Pre-Winter

14+5+21 +2%MgO
(14+2.2+17.4 + 1.2%Mg)

Turf grass needs only a small amount of nutrient during the winter months, even when our winters seem warmer than usual

- Gives enough nutrients for comfortable survival
- Provides an excellent start for spring
- Minimal leaching

Application rate: 45g per sq. m

Area treated by a 15kg bag: 330sq. m

Suggested use period

Longevity: 4-5 months

Full Season

27+5+5 + 2%MgO
(27+2.2+4.1 + 1.2%Mg)

A time-saving mineral fertilizer that only needs to be used once a year to supply nutrients throughout the growing season

- The nutrients are supplied gradually over an 8 or 9 month period
- Balanced growing pattern with excellent roots
- Strong resistance to disease and weeds

Application rate: 60g per sq. m

Area treated by a 15kg bag: 250sq. m

Suggested use period

Longevity: 8-9 months

Landscaper Pro Weed Control + Fertilizer

22+5+5 + 2.4D + Dicamba
(22+2.1+4.1)

A granulated product that will easily control most broad-leaved weeds while stimulating the grass plants around the weeds to cover the resulting bare patches

- Annual or biannual application of this product gives excellent results
- Creating thick, weed free turf coverage
- Lasting resistance to new weeds
- MAPP No. 14128 PCS No. 03724

Application rate: 20g per sq. m

Area treated by a 15kg bag: 750sq. m

Suggested use period

Longevity: 6-8 weeks

Landscaper Pro Moss Control + Fertilizer

18+0+0 + Ferrous sulphate
(18+0+0 + Ferrous sulphate)

Shaded areas can suffer from moss, and this easy to handle product will help to restrict the moss growth

- Simultaneously stimulates the grass plant
- Provides rapid cover to bare patches
- Results are noticeable in days
- MAPP No. 14317 PCS No. 92371

Application rate: 30g per sq. m

Area treated by a 15kg bag: 500sq. m

Suggested use period

Longevity: 6-8 weeks

Water Control

Formulated to help increase the availability of moisture in the soil during drought periods. In heavy rainfall areas, the same product helps to increase water absorption to deeper soil

- Produces a more balanced plant growth
- Reduces water run-off
- Improves water storage in pots during dry periods

Application rate: 20g per sq. m

Area treated by a 10kg bag: 500sq. m

Suggested use period

Longevity: 8 weeks

HandyGreen™ II Spreader

A hand-held spreader that disperses Scotts fertilizers as you turn the handle. Comfortable to hold and easy to use, it is suitable for small to medium lawns.

AccuGreen 3000

Top-selling drop spreader with a 22inch spread pattern holds 10,000 square feet of fertilizer.

Grass seed

High quality turf right from seed

Sun & Shade Grass Seed

Variation in light can be tough on grass, Landscaper Pro Sun & Shade is designed to help with these contrasts

- Uniquely blended and tested thoroughly under varying light conditions
- Superior shade and wear tolerance
- Hardiness to harsh sunshine

Performance Grass Seed

For the ultimate hardwearing lawn, it is blended with rye grasses to help it quickly develop into an attractive multi-purpose lawn

- Tough enough to stand up to regular use by children and pets
- Excellent wear tolerance
- Excellent recovery rate

Finesse Grass Seed

Our highest quality blend, it is a state-of-the-art seed mix developed to produce a high quality lawn and landscape area

- Contains more fine fescues
- Produces a fine-leaved, dense lawn
- Beautiful colour and good wear tolerance

Flora

15+9+11 + 3%MgO
(15+3.9+9.1 + 1.8%Mg)

Based on Scotts' world-renowned Osmocote technology, Landscaper Pro Flora is used by professional pot plant and nursery growers across the globe

- Unique nutrient blend promotes maximum flowering
- Healthy overall plant development
- Can be used for borders, shrubs and ornamental trees

Application rate: 35g per sq. m

Area treated by a 15kg bag: 420sq. m

Suggested use period

Longevity: 5-6 months
