REGENCY TURF SPECIFICATION SHEET

DETAILS

If the health of your turf is an issue in shaded areas, Regency provides the solution. This medium texture, low-maintenance turf is grown using grass cultivars which flourish in a shaded environment. It is grown for a minimum of 18 months before harvesting.

Regency is suitable for use in municipal gardens, shaded landscapes and lawns, all recreational areas and on golf tees and racecourses.

Key benefits: - Extremely High Shade Tolerance

- Very aggressive with unique stoloniferous creeping ability
- Medium texture - grown for 18 months
- Exceptional wear tolerance due to high shoot density
- Superb year round colour - impassive to climate change
- Drought tolerant
- Low maintenance - 50% less mowing than a conventional Rye lawn
- Requires less fertilizer but little and often

TYPICAL SEED COMPOSITION - Regency (without Ryegrass)

Grass Species - **100% Supra / Supranova** - Poa Supina

S.T.R.I. CULTIVAR PROFILE

Supina Bluegrass Lateral above ground stems (Stolons) grow outwards from the main plant reproducing more shoots as it develops, enabling the plant to repair itself in a continuous manner. Native to Alpine areas, it is the last grass to fall into dormancy and the first to actively grow in the spring. County Shade has been specifically produced to flourish under the changing climate.

KEY DATA

Roll Size Standard Roll 1m² 610mm wide x 1.64m long.

Big Roll 20m² 740mm wide x 27.1m long.

Extra Wide Big Roll 35m² 1250mm wide x 28m long.

Washed Turf Roll Available in all above sizes

Soil and Thickness Grown on sand or sandy loam

Standard Thickness 15-20mm

Laying Equipment Tractor mounted Big Roll laying frames

(Free loan) Pedestrian hand trollies (0.74m wide only)

Full contracted laying service
